

## 10 years MONUMENTO Salzburg...

### ... as a platform for cross-border cultural heritage exchange - on the pulse of time.

Discover the latest developments for yourself - because „tomorrow begins today“. We present the latest trends and innovations on the topic of sustainability for everyone interested, so that the heritage can be passed on to the heirs undamaged.

#### **Monument conservation - Restoration - Craft**

Monument conservation preserves special historical, cultural or artistic achievements for future generations. The exhibitors are caught between the conflicting priorities of long-term preservation and sustainable economic use of the objects.

#### **Cultural tourism - Folk Culture**

In cultural tourism, private and public cultural providers and regions present successful strategies for planning, offering and implementing cultural tours.

#### **Museums - Collections**

The Museum segment offers the opportunity to explore new strategies, technique and success stories for exhibition design.

#### **Historical gardens and innovative greenery**

Historic gardens and parks are places of recreation, a blessing for body and soul. In order to maintain these living works of art made of landscaped nature and architecture, expert knowledge, sensitivity and many caring hands are required.

Help us to pass on the legacy to the next generation without damage and do not hesitate to contact us.
