The glittering gold is investors' delight. Investment in gold has brought remarkable returns to investors. Gold as an investment asset has often outperformed other asset classes. India is a large importer and consumer of gold. The allure of the yellow metal for jewelry and for investment is undiminished. As an excellent portfolio-diversifier, gold should be an integral part of everyone's investment strategy, say experts.

By their very nature, commodity markets are volatile, and the gold market is no exception. It is necessary to manage the price risks through hedging which is an insurance against adverse price movement. Options trading provide an effective form of insurance against adverse price movement. Those with exposure to the physical commodity can benefit from using Options contracts.

To advance the idea of using Options contracts for price risk management as well as for investment, IMC Chamber of Commerce and Industry along with BSE has organised an investor awareness program. The program seeks to educate the investors and other users of the Options contract about the dynamics of the bullion market so that buying / selling / trading decisions are well informed, scientific and cost-effective.

A Special address would be delivered by Mr. Surendra Mehta, National Secretary, India Bullion and Jewellers Association Ltd. Key speakers are Mr. G Chandrashekhar, Economic Advisor, IMC and Director IMC-ERTF and Mr. Ranjit Singh, DGM, Product and Business Development, BSE Ltd
